OVERVIEW

Standss is excited to announce the release of SendGuard quarterly updates. This is a new release and contains new features, improvements, and bug fixes.

The key highlights of this release include **mass marketing risk compliance, localization support, and speed optimization for DLP scanning.**

Users of previous versions will need to contact their account manager at Standss (or email us at sales@standss.com) to upgrade and get their new license information.

The following sections have more information on what's new, what's fixed and updates/deployment.

SendGuard COM-Addin (Windows Desktop)

WHAT'S NEW

Mass Marketing Risk Compliance (Prompt to Move Recipients to BCC for High Recipient Count)

A new prompt has been added to SendGuard, alerting users when the recipient count exceeds a configurable threshold. Before sending the email, this prompt alerts users to move recipients to the BCC field, thus enabling recipient privacy for marketing emails. This feature can be configured within the settings screen.

Localization Support

SendGuard now supports localization across key prompts, including SendConfirm, SendRules, DLP, and Reply Guard. Users can now choose from a range of supported languages: **English (US), French, Danish, German, Japanese, Spanish, and Dutch (Netherlands)**. The language change is controlled via a registry key. Please contact your Account Manager at Standss or email us on sales@standss.com for more details.

SendGuard M365 Addin (For New Outlook (Windows & Mac), Outlook Web Access & Legacy Outlook for Mac)

WHAT'S NEW

Mass Marketing Risk Compliance (Prompt to Move Recipients to BCC for High Recipient Count)

A new prompt has been added to SendGuard, alerting users when the recipient count exceeds a configurable threshold. Before sending the email, this prompt alerts users to move recipients to the BCC field, thus enabling recipient privacy for marketing emails. This feature can be configured within the settings screen.

Localization Support

SendGuard M365 now supports localization across key prompts, including SendConfirm, SendRules, DLP, and Reply Guard. Users can now choose from a range of supported languages: **English (US), French, Danish, German, Japanese, Spanish, and Dutch (Netherlands)**. The language change is controlled via the deployment file (manifest). Please contact your Account Manager at Standss or email us on sales@standss.com for more details.

Improvements

Major Speed Optimization for DLP Scanning

Significant optimizations have been made to the SendGuard code base for Data Loss Prevention (DLP) scanning. The mechanism for detecting trigger words within emails and attachments now operates with improved speed and reduced processing demands, enhancing the overall user experience when sending emails.

Contact List Support

SendGuard now supports contact lists, displaying them as **@DistributionList** in the SendConfirm prompt. These contact lists are treated as external recipients, as they do not have a specific email address associated with them.

UI Update for SendConfirm

The SendConfirm interface has been updated to enhance the user experience with a refreshed design, supporting multiple recipients and attachments and incorporating branding policies.

Improved Settings Caching Policies

SendGuard now caches enterprise settings on the client browser for up to 4 hours, reducing the need for frequent server connections. This caching enhancement minimizes latency, allowing for a faster and more seamless email-sending experience.

Standss SendGuard License Management System

WHAT'S NEW

Audit Logging in Portal (Change History)

A new logging feature has been introduced to track key actions within the portal. IT admins and Standss Admin Agents' actions, including changes to subscription details, adding or removing users, and updating settings, are now logged. These logs can be accessed on the Manage Subscription page under **View Change History**, providing greater transparency and accountability for administrative changes.

Additional SendGuard M365 Settings

The portal now includes additional settings for SendGuard M365, allowing IT administrators with convenient control over these features. The newly added settings cater to the following functionalities:

Enable recipient privacy for marketing emails	
Remind to move recipients to BCC	Yes <input type="button" value="v"/>
When TO/CC recipient count exceeds:	<input type="text" value="3"/>

DEPLOYING THE NEW VERSION:

MSI

Please contact your account manager at Standss or email us at sales@standss.com for a link to the latest file. We can assist you to deploy the new version with your existing or new settings.

Use Group Policy Object (GPO) Templates (ADMX)

There has been some changes to the registry structure and as a result the ADMX template for deployment is done via GPO.

Please contact us at sales@standss.com for the updated ADMX/ADML file to deploy and maintain settings.

Priority Updates

SendGuard offers an annual maintenance model which ensures that businesses get the best updates and support from our Outlook addin experts.

Deploy using Microsoft Intune

SendGuard for Outlook is a per-machine software and therefore can be deployed via Intune. SendGuard will be installed silently if all registered devices are set-up correctly.

Please contact us at sales@standss.com for assistance regarding deployment using Microsoft Intune.

Deploy SendGuard M365 using Office 365 Admin Centre

You can utilize Office 365 Admin Centre to deploy SendGuard for M365. If you have previously deployed the add-in, there is no need for redeployment as the new updates have already been pushed out. If you wish to modify your settings or require additional information regarding the deployment of SendGuard M365, please reach out to your account manager or contact sales@standss.com
