Customer Success Story

A Simple Step That Transformed Email Accuracy Across a Global Team

Amesto Global

Corporate Services

30 users

Ireland

SendConfirm

Amesto Global manages complex, cross-border corporate services for clients across Europe and North America with offices in Ireland, Spain, the United States, and the United Kingdom. Their teams exchange sensitive material, such as financial statements, payroll documents, regulatory correspondence—where accuracy and confidentiality matter.

SendGuard helps me take a pause and double-check the email I'm sending. It's a small step that makes a big difference.

—Sims Tullos, Partner, Amesto Global

Business Challenge

With high volume and busy schedules, even well-trained teams can face risks: a mistyped name, the wrong attachment, or a message sent to the incorrect recipient. In corporate services, a single oversight can create compliance issues or damage client confidence.

The Solution

SendGuard provided the lightweight, intuitive “double-check” step the team needed.

Users receive prompts to verify recipients, attachments, and content before sending—right when it matters most.

It rolled out quickly across global offices and integrated seamlessly into Outlook.

SendGuard for Outlook stops emails from being sent to the wrong recipients, protect sensitive data—even *after* you click Send.

Results

The pre-send checks in SendGuard help us maintain high standards of accuracy and compliance, without slowing down our workflow

—Sims Tullos, Partner, Amesto Global

After implementation, the shift was immediate. Fewer errors. Fewer follow-up corrections. Stronger confidence in sending sensitive information. Even small details—like ensuring a client's name is correct—became consistently reliable.

For Amesto Global, SendGuard raised communication quality, accuracy, and confidence across every office. A small additional step delivered a significant improvement for a company entrusted with sensitive financial and corporate data.
