

“We built SendGuard on Microsoft’s trusted ecosystem to stop email errors before they happen. Alchelyst’s success shows the value of proactive protection.”

Sanjay Singh, CEO/CTO, Standss

Highlights

Emails containing sensitive information are often sent to incorrect recipients.

SendGuard for Outlook increases security and dramatically reduces email errors.

With SendGuard for Outlook, Alchelyst reduced outbound email errors by 100%.

About partner

With over 20 years of experience, Microsoft partner Standss (South Pacific) PTE Ltd has built a reputation for creating Microsoft Outlook productivity tools trusted by thousands of users worldwide.

Standss SendGuard for Outlook boosts security and reduces outbound email errors by up to 100 percent

The challenge

Employees frequently risk sending emails containing sensitive information to incorrect recipients or attaching wrong documents, resulting in unnecessary risks and time wasted trying to recall or correct emails.

The solution

SendGuard for Outlook reduces outbound email errors, enhances security protocols, reduces the time required for corrections, and fosters greater confidence and productivity among employees.

The results

- SendGuard for Outlook provided Alchelyst with a tailored solution to address their specific needs. SendGuard's delay send feature proved invaluable in preventing common mistakes that occur during the fast pace of daily communications.
- “SendGuard has been instrumental in helping our teams proactively identify and correct potential mistakes before they become issues, giving us greater confidence in every message we send,” said Charles Gillanders, Chief Information Officer, Alchelyst.
- By combining proactive prompts, real-time verification, and controlled email delivery, SendGuard for Outlook enabled Alchelyst to maintain high standards of accuracy and security without hindering daily operations.
